**AVALANCHE WARNING BULLETIN**

Valid from 12-Mar-2018 (1700 hrs) to 13-Mar-2018 (1700 hrs)

S. No.	District	Danger Level	Altitude(m)
<b>A. Jammu Division</b>			
1	Poonch	1	
2	Rajouri	1	
3	Reasi	1	
4	Ramban	1	
5	Doda	1	
6	Kishtwar	1	
7	Udhampur	1	
<b>B. Kashmir Division</b>			
1	Anantnag	1	
2	Kulgam	1	
3	Badgam	1	
4	Baramulla	2(Yellow)	
5	Kupwara	2(Yellow)	
6	Bandipora	1	
7	Ganderbal	1	

S. No.	District	Danger Level	Altitude(m)
<b>C. Laddakh Division</b>			
1	Kargil	1	
2	Leh	1	
<b>D. Himachal Pradesh</b>			
1	Chamba	2(Yellow)	
2	Lahaul Spiti	2(Yellow)	
3	Kullu	2(Yellow)	
4	Kinnaur	1	
5	Shimla	1	
<b>E. Uttarakhand</b>			
1	Uttarkashi	2(Yellow)	
2	Chamoli	2(Yellow)	
3	Rudrapur	1	
4	Pithoragarh	1	
5	Tehri Garhwal	1

Dr. M.S. Shekhar  
SCIENTIST 'E'  
FOR DIRECTOR

Danger Level	Degree of Danger	Description
1	UNLIKELY	Generally safe conditions. Snowpack on slopes is generally stable with isolated instabilities. Movement is generally safe. Rare avalanche activity is possible with high external loading e.g. tremors, explosives or movement in formation zones.
2	LOW	Partly unsafe conditions. Small size triggering is possible on few extreme slopes. Valley movements are generally safe. Movement on slopes with care.
3	MEDIUM	Unsafe conditions. Triggering is possible from the most avalanche prone slope and may reach the valley in medium size. Avoid settlements on/near the avalanche paths. Valley movement with precaution. Evacuate from unprotected settlements.
4	HIGH	Highly unsafe condition. Triggering is possible from all avalanche prone slopes and may reach the valley in large size. Suspend all movements. Airborne avalanches likely. Evacuate from all settlements on/near the avalanche paths.
5	ALL ROUND	Extremely unsafe condition. Numerous large avalanches are likely from all possible avalanche slopes even on moderately steep terrain. Airborne avalanche likely and may follow unsuspected paths. Evacuate from avalanche prone areas.

*Disclaimer: Above information warning bulletin is provided after analyzing the current instability state of snowpack, current snow and not data from the field stations and projected weather from models. It is our endeavor to assess the instability state as accurately as possible and draw a precise avalanche forecast. However, precautions must be observed during all movements irrespective of the level of danger predicted.*
