AVALANCHE WARNING BULLETIN

Valid from 13-Mar-2018 (1700 hrs) to 14-Mar-2018 (1700 hrs)

S. No.	District	Danger Level	Altitude(in)	S. No.	District	Danger Level	Altitude(m)
A. Jammu Division				C. Laddakh Division			
1	Poonch	1		1	Kargil	2(Yellow)	
2	Rajouri	1		2	Leh	1	
3	Reasi	1		D. Himachal Pradesh			
4	Ramban	1		1	Chamba	2(Yellow)	
5	Doda	1		2	Lahaul-Spiti	2(Yellow)	
6	Kishtwar	1		3	Kullu	2(Yellow)	
7	Udhampur	1		4	Kinnaur	1	
B. Kashmir Division				5	Shimla	1	
1	Anantnag	1		E. Uttarakhand			
2	Kulgam	1		1	Uttarkashi	2(Yellow)	
3	Badgam	1		2	Chamoli	2(Yellow)	
4	Baramulla	3(Yellow)		3	Rudraprayag	1	
5	Kupwara	3(Yellow)		4	Pithoragarh	1	
6	Bandipora	3(Yellow)		5	Tehri Garhwal	1	
7	Ganderbal	1					

 Dr. M S Sukhar
 SCIENTIST 'E'
 FOR DIRECTOR

Danger Level	Degree of Danger	Description
1	UNLIKELY	Generally safe conditions. Snowpack on slopes, if any, is generally stable with isolated instability. Movement is generally rare. Rare avalanche activity is possible with high external loading e.g. tremors, explosives or movement in formation zones.
2	LOW	Partly unsafe conditions. Small size triggering is possible on few extreme slopes. Valley movements are generally safe. Movement on slopes with care.
3	MEDIUM	Unsafe conditions. Triggering is possible from the most avalanche prone slope and may reach the valley in medium size. Avoid movement on slopes. Routes should be selected with care. Valley movement with precaution. Evacuate from unprotected settlements on/near the avalanche paths.
4	HIGH	Highly unsafe conditions. Triggering is possible from all avalanche prone slopes and may reach the valley in large size. Suspend all movements. Airborne avalanches likely. Evacuate from all settlements on/near the avalanche paths.
5	ALL ROUND	Extremely unsafe condition. Numerous large avalanches are likely from all possible avalanche slopes even on moderately steep terrain. Airborne avalanche likely and may follow unexpected paths. Evacuate from avalanche prone areas.

Disclaimer: Above information warning bulletin is provided after analyzing the current instability state of snow pack, current snow and wet data from the field stations and projected weather from models. It is our endeavour to assess the instability state as accurately as possible and draw a precise avalanche forecast. However, precautions must be observed during all movements irrespective of the level of danger predicted.
