Time of Issue: 0800 hours IST Based on 0530 hours IST Observations

All India Weather Inference (MORNING)

- ♦ The low pressure area over southwest Bay of Bengal and adjoining Equatorial Indian Ocean & south Sri Lanka coast and associated cyclonic circulation extending upto mid-tropospheric levels persists. It is likely to become more marked and move westwards during next 48 hours.
- ♦ The other trough of low at mean sea level from Lakshadweep area to Konkan along the west coast persists.
- ♦ The fresh western Disturbance as an upper air cyclonic circulation at 3.1 km above mean sea level over eastern parts of Afghanistan and neighbourhood persists.
- ♦ The cyclonic circulation over south Pakistan & adjoining west Rajasthan extending upto 1.5 km above mean sea level persists.
- ♦ The north-south trough in the westerlies roughly along Long. 88°E to the north of Lat. 25°N between 2.1 and 3.1 km above mean sea level persists.
- ♦ The cyclonic circulation over south Konkan & adjoining Madhya Maharashtra at 0.9 km above mean sea level persists.
